

The right notary. On time.

Turn urgency into a lasting relationship.

An urgent need.
Capacity that is hard to find.

Nota connects the client's date
to the notary's capacity.

01 Connect 02 Automate 03 Enable signing

Starting point: financing and refinancing in Québec City. Available-capacity gaps must be measured in the pilot.

A local foothold. A global profession.

A measurable entry point for a recurring-use product.

205

target acts / year

25% of the qualifiable pool

$10,271 \times 10\% \text{ qualifiable} \times 25\% \text{ captured} \times 80\% \text{ completed}$

Local assumptions: ≈ 2% of observed sales after completion. Nested territories are not additive; European notaries ≠ paid seats.

Partners open the market.

Distribution built into professionals' everyday work.

Current program: \$50 per retained referred request; \$250 on a referred notary's first retention. Terms require validation.

A tool that improves with notaries.

Automate repeatable preparation; free up expertise.

80 %
less preparation time

Human-time target

Notary review remains included.

Use without contributing

Pay without participating in improvement.

Unproven target; defined scope and correction time must be measured. Proposed offers; advice, judgment and approval remain with the notary.

A chain of evidence designed for Nota.

From prepared file to completion in one workflow.

Nota protocol → Chambre des notaires

Design. Present. Obtain validation.

Proposed protocol, with no acceptance secured. Electronic signing already exists; remote signing remains regulated.

Contribution funds distribution.

Client-paid Nota fees; notary fees are preserved.

Contribution

After rewards

Positive contribution per act to support distribution.

Rounded CAD, Y1 scenario. Rewards are already in acquisition budgets. Contribution per act ≠ company net profit.

Grow with capacity.

Concentrate on Québec City, then expand as evidence supports it.

YEAR 1	YEAR 2	YEAR 3
244	2,800	11,000
completed acts	completed acts	completed acts
–\$204,623	–\$200,496	\$194,851
operating result	operating result	operating result

Verified capacity → measured acquisition → funded expansion.

Scenarios, not traction. Y3 requires substantial provincial expansion. No AI or signing revenue included; additional funding is needed.

Value grows through use.

Connect distribution, learning and file completion.

Intended advantage, to measure in cohorts. Voluntary, authorized feedback. Nota earns its own fees and, later, software subscriptions.

Fund the proof. Open the next stage.

An initial market, a capacity engine, an international ambition.

\$250,000

to launch the pilot

12 months to turn
the product into evidence.

Deliver

A cohort and actual completed acts.

Measure

Preparation savings and contribution.

Validate

The protocol and its requirements.

Base: \$45,377 at Y1 end; at least \$180,119 more before unmodeled obligations. info@gonota.ca
